PROFESSIONAL SUMMARY

Passionate and innovative software developer with hands-on experience in web development and 3D visualization projects. Proficient in Python, JavaScript, and SQL, with a strong ability to collaborate in team environments and deliver user-focused digital solutions. Adept at leveraging modern tools and frameworks to solve complex problems and improve system efficiencies.

SKILLS

Programming Languages	Python (Basics), C, HTML, CSS, SQL, React, Bootstrap, Javascript
Tools & Frameworks	Three.js, Supabase, Blender, Laravel, Power BI, Microsoft Excel
Soft Skills	Teamwork, Adaptability, Communication, Problem-Solving
Certifications	IBM AI Fundamentals, Full Stack Web Development

EDUCATION

MERN Stack Development (Upskilling Program)	2025 – Present
Edure Institution, Thiruvananthapuram	
<i>Focused on full-stack web development using MongoDB, Express.js, React.js, and Node.js</i>	
B.Tech in Computer Science , University College of Engineering, Kariavattom	2021 - 2025
Relevant Coursework: Web Development, Data Structures, Database Management	

PROJECTS

Cropzo – Farmer–Consumer Platform	<i>Edure Learning</i>
<i>HTML, CSS, Bootstrap, JavaScript</i>	
- Developed a web based marketplace that bridges the gap between farmers and customers. - The platform allows farmers to list and sell their produce directly, manage inventory through a dedicated dashboard improving profit margins. - Customers can browse fresh produce and place direct orders from verified farmers, ensuring quality and transparency. - The project empowers local farmers with digital tools to manage their business efficiently while helping customers access affordable, traceable farm products in one place.	
3D Interactive Campus Navigation System	<i>University Major project</i>
<i>Three.js, Blender (GLTF Models), Supabase (PostgreSQL)</i>	
- Designed a web-based 3D navigation system to enable real-time campus exploration. - Implemented features such as zoom, tilt, object selection, and contextual tooltips. - Achieved enhanced user engagement by integrating dynamic building data visualization.	
YouTube Video Summarization to Regional Languages	<i>University Minor project</i>
<i>Python, Natural Language Processing</i>	
- Developed a system that provides summaries of YouTube videos in regional languages. - Streamlined content consumption for diverse linguistic communities.	

TRAINING & CERTIFICATIONS

- Data Structures and Algorithm(Pursuing)
- IBM AI Fundamentals (Issued by IBM SkillsBuild)
- Introduction to Data Analytics (Learntube.ai, July 2024)
- Power BI for Beginners (Conducted by SimpleLearn)
